

Project: Land Slippages following Extreme Storm Event

Client: Various

Location: Central North Island

Date: 2004

Following the February 2004 storm event RILEY was approached by a number of clients and asked to assess land slippage and erosion at approximately 30 locations in the Manawatu, Wanganui and Wairarapa areas.

Involvement included:

- ❖ assessments of damage
- ❖ assessment of the risk of further slippage or erosion and the potential for increased damage and loss
- ❖ Proposed measures to ensure the security and safe ongoing use of the properties
- ❖ assessment of the likely condition of the affected areas and degree of stability existing prior to the event.
